

## ConPEG

If you want to add some additional drama to your friendly game of fastrack feel free to incorporate this ConPEG into your game.

**WARNING:** The ConPEG should only be used by experienced players, as extreme frustration could occur if still trying to learn the basic game at the same time as incorporating the ConPEG.

### Directions:

The ConPEG starts in the bullseye (center hole) of the game board at the beginning of a new game. The ConPEG is only activated if a peg ends its turn on the ConPEG. When you land on it, you now have the power to do some good for yourself / your team or inflict damage on your opponents. Once activated the ConPEG can be placed anywhere on the board except for a pegs home or starting place.

**Option 1:** You can land the ConPEG on one of your own or your partners pegs in play and send that peg to any available spot in its home.

**Option 2:** You can land the ConPEG on any of your opponents pegs that are in play and send them back to their starting place,

**Option 3:** You can land the ConPEG in a strategic place where you know you or your partner can easily land on it for use another time.

**Note:** If you are splitting a 7 to land on the ConPEG, the peg used on the first half of the 7 is an acceptable target of the ConPEG when used for the second half of the seven.
